

# Why GPC?

**At Great Plains Communications (GPC), we provide the powerful network performance and reliable support your business needs to grow.**

## The Reliable Foundation

Your business needs constant uptime. Our network keeps your critical applications online.

- **Five-Nines Reliability:** Our core network delivers 99.999% reliability when you need it most.
- **Protection from the Elements:** We bury 99% of our fiber to reduce risk from weather and accidental cuts.
- **Built-In Redundancy:** Our fully meshed, ringed network keeps data moving securely and reliably.

## Scalability That Keeps Pace with Your Vision

As your bandwidth grows, your network scales with you. It will not become a bottleneck.

- **Future-Proof Engineering:** Our network supports bandwidth up to 400 Gbps for your current and future needs.
- **Massive Regional Reach:** Access our 20,000+ mile fiber network across the Midwest and beyond.

## A Partnership, Not Just a Provider

We provide a local, human-centric approach to support.

- **Dedicated Implementation:** Our local experts guide you through every installation step.
- **24/7/365 Monitoring:** Our Blair, Nebraska, Network Operations Center monitors your network around the clock for superior connectivity.
- **Rapid, Local Response:** Our experienced technicians are nearby to troubleshoot and optimize your system.
